

MAGNAVISION

An extremely versatile and vital inspection device for medical, diagnostic, research and general application. Where ever good & clear magnification is needed with pin point accuracy.

New design & construction have gone into the making of a new floor stand model with moulded plastic base and other superior features which include.

Easy manoeuverability just at a finger touch. It can be fixed with a new fixture to convert it into table clamp magnavision or wall mounted magnavision. A new addition to our magnavision line of products and the extension arm attachment. In medical applications, it is ideal for use in Gynaec cases & ophthalmic procedures, skin & plastic surgery, suture removal, minor surgeries, OPD procedures, colony counting micro biology. Illumination provided by internally fitted, imported white bright tube. Very handy for highly placed / complicated surgical work (both pre and post OP) also use for OPD procedure, clear reading of small size print on any medical related references/footnotes/contraindication on drug labels, etc.
